

## Vision

To brand crescent group of education institution at the global level by creating a unified academic ecosystem through a structured “School-to-start-up” continuum, Innovation and leadership.

To establish Crescent as a globally recognized knowledge, innovation and entrepreneurship ecosystem that develops future-ready leaders, entrepreneurs, researchers and institutions, while creating sustainable global impact through education, technology, industry collaboration and international partnerships.

## Mission

To build an integrated global ecosystem that connects academia, government, industry, investors, entrepreneurs, researchers and international institutions to transform knowledge, talent and innovation into measurable economic, social and institutional impact.

Our mission is to:

1. **Create a unified academic and innovation ecosystem** across Crescent institutions through a structured “**School-to-Start-up**” continuum.
2. **Develop future-ready human capital** through executive education, professional development, skill enrichment, upskilling and reskilling in emerging and frontier technologies.
3. **Build cross-institutional research and innovation capabilities** by sharing expertise, infrastructure, knowledge and resources.
4. **Create Shared Centres of Excellence** that bring together academic expertise, industry requirements and global knowledge.
5. **Develop a common innovation pipeline** from ideas and research to incubation, acceleration, commercialization and global market access.
6. **Strengthen Industrial–Academic Collaboration** through strategic partnerships, internships, placements, applied research, consulting and technology transfer.
7. **Position alumni as a strategic global asset**, engaging them as mentors, recruiters, researchers, donors, entrepreneurs and international ambassadors.
8. **Create international pathways and partnerships** connecting Crescent with global universities, corporations, governments, investors and innovation ecosystems.
9. **Develop sustainable commercial opportunities** by converting institutional knowledge, intellectual property, research and innovation into scalable ventures and strategic partnerships.
10. **Build a globally recognized institutional brand** around the principle:

**“From Learning to Leadership. From Knowledge to Innovation.”**

## **Three Strategic Streams**

### **1. Global Centre of Excellence – Entrepreneurship, Innovation & Acceleration**

Establish a GCoE focused on:

- Entrepreneurial Development
- Innovation and Incubation
- Global Acceleration
- Executive and Leadership Development
- Built Environment and emerging sectors
- Applied Research & Development
- Industry–Academia Collaboration
- Global technology and investment partnerships

The objective is to create a continuous pipeline:

**Learning → Ideas → Innovation → Incubation → Acceleration → Commercialization → Global Impact**

### **2. Human Resource Development & Management**

#### **2.1 Human Resource Development**

Develop a future-ready talent ecosystem through:

- Executive Education
- Professional Training
- Skill Enrichment
- Upskilling and Reskilling
- Leadership Development
- Industry-oriented certification programmes
- Global workforce development

Priority areas include:

**Artificial Intelligence (AI) | Cybersecurity | Blockchain | Machine Learning & Deep Learning  
Data & Digital Technologies | Emerging Technologies**

## **2.2 Human Resource Management Services – HRMS**

Develop professional HR management services and verticals covering:

- Talent Acquisition
- Workforce Planning
- Learning & Development
- Performance Management
- Leadership Development
- HR Analytics
- Organizational Development
- Employee Engagement
- HR Technology and Digital Transformation
- International Talent Mobility

## **3. Mobility, Advanced Technology & Life Sciences**

Develop strategic verticals in high-growth and future-oriented sectors, including:

- Mobility
- MedTech
- HealthTech
- Biotechnology
- Life Sciences
- Advanced Engineering and Mobility Technologies

The objective is to establish partnerships among universities, technology companies, governments, investors and research institutions to accelerate innovation and commercialization in emerging sectors.

## **Strategic Institutional Philosophy**

The CGOM ecosystem will operate on the principle:

One Ecosystem, Multiple Pathways, Shared Knowledge, Collective Innovation, Global Impact.

This approach will enable Crescent to move beyond a conventional education model towards an integrated ecosystem where education, entrepreneurship, research, innovation, industry and global engagement reinforce one another.

## **Strategic Outcome**

The ultimate objective is to establish Crescent as a globally connected institution and knowledge ecosystem, capable of producing talent, creating intellectual property, nurturing entrepreneurs, developing industry partnerships, attracting global opportunities and generating sustainable economic and social impact.

**“From School to Start-up.  
From Learning to Leadership.  
From Knowledge to Innovation.  
From Crescent to the World”**
